

1) Go to www.myjohndeere.com

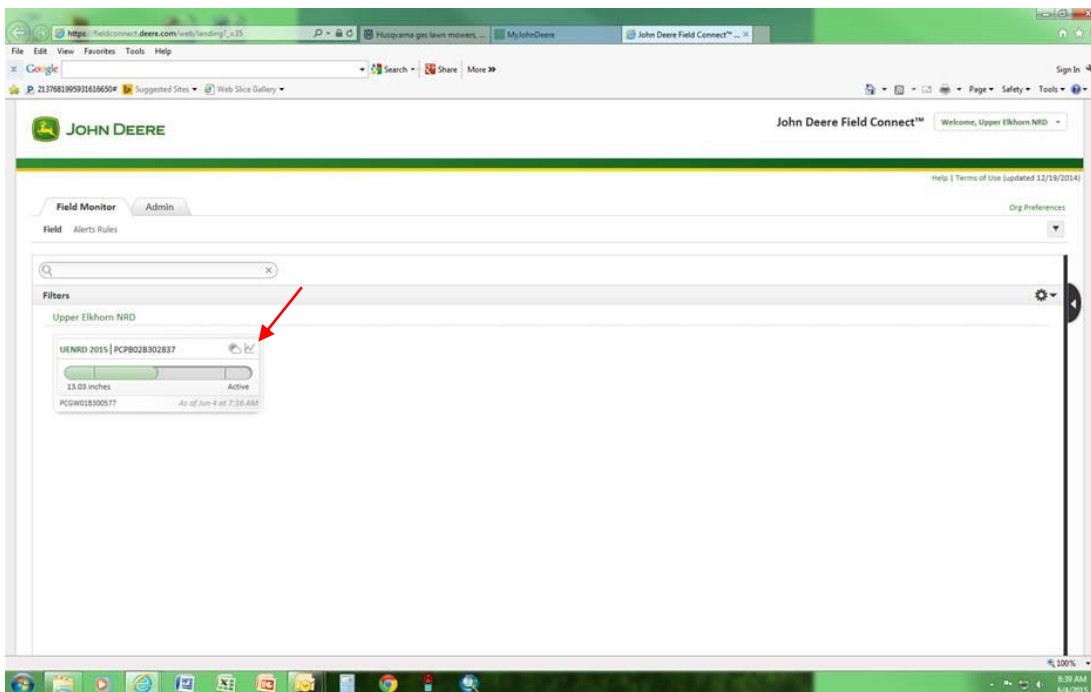

Username: upperelkhornnrd

Password: Brandon2015

2) Click on the “Field Connect” icon

3) Under the field monitor tab click on gray chart icon to view the moisture sensor data;

4) This will bring you to charts of the collected data: By clicking on the menus in the “Soil Moisture Options” you can change what you see – you can have it show moisture level by individual sensor, etc. Menus under the “Settings” will show data collected by the weather station. You must click the yellow UPDATE DATA button after each selection for the screen to change
